## **CSCC's C-TPAT Third-Party Validation Services Receive SAFETY Act Designation by US Department of Homeland Security**

**LOS ANGELES, CA (October 12, 2007)** – Cal Safety Compliance Corporation (CSCC), a wholly-owned subsidiary of Specialized Technology Resources, Inc. (STR), is pleased to announce that its C-TPAT (Customs-Trade Partnership Against Terrorism) Third-Party Validation Services received SAFETY Act Designation by the US Department of Homeland Security.

First passed in 2002, the SAFETY (Support Anti-Terrorism by Fostering Effective Technologies) Act promotes the development and use of innovative technologies to detect and prevent terrorist activity. With this designation, CSCC will benefit from risk mitigation measures aimed at establishing the limits of liability as a result of terrorist activity.

CSCC is honored to be recognized as a pioneer of qualifying anti-terror technologies as we continue to deliver to our clients the confidence they need to make informed global sourcing decisions.
